STORY

The year is 62226. The universe is filled to its brim with beings, empires, and civilizations. There is no unclaimed ground left.

Except one place: at the edge of “Black-Hole-WX-89”, something impossible is tearing itself into existence.

A virtual world, promising something no galaxy has left to offer: unlimited space and unlimited time. An old signal, half prophecy and half warning, has been circling the universe for longer than anyone can verify:

“…only the One intelligence, superior to all others, may enter – and it alone will be crowned Colony: One…”

CLOUDFLIGHT CODING CONTEST

COLONY: ONE

You are Kernel-76. A stripped-down Kernel nobody expects to make it very far. No crew, no plan. Just you, standing at the edge of a world that shouldn't exist, watching the entrance flicker open.

Thousands have tried to cross the threshold and failed. And then, in the static behind the light, you feel it: something else is already inside. It moves like you. It thinks like you. And it has a Ping on its side – how unfair is that!?

… and in the prophecy … there's only room for One.

CLOUDFLIGHT CODING CONTEST

COLONY: ONE

LEVEL 1 – IN A PINCH

Your objective:

Play two actions on the game board to reach a tile that is safe from the MAGENTA's Kernel and Ping.

You will have to clear 3 scenes.
The next page is about the game rules.

CLOUDFLIGHT CODING CONTEST

COLONY: ONE

BOARD

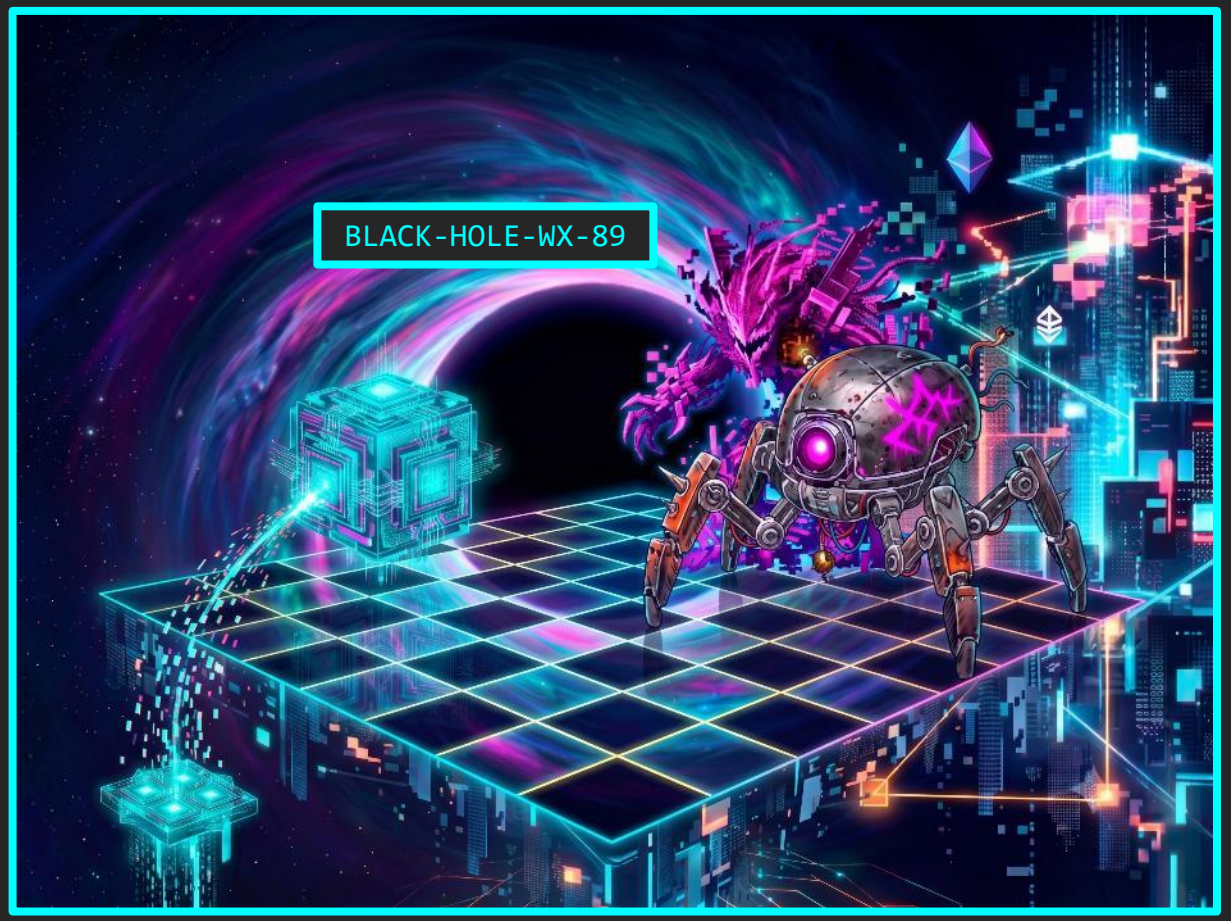

- 8×8 tiles. Two teams: CYAN (you) and MAGENTA. On the board, K = Kernel and P = Ping.
- Turn-based: a turn is exactly two actions by one team. CYAN starts.
- An action is one piece moving or shooting. The same piece may act twice. You cannot skip an action.
- A round is CYAN's turn followed by MAGENTA's turn.

KERNEL

- Per action, the Kernel moves 1 step to any adjacent tile. An enemy piece on that tile is captured.
- The Kernel is the centerpiece of the game: lose it and you lose immediately; capture the enemy Kernel and you win.

PING

- Move: up to 2 tiles orthogonally, onto empty tiles only. It cannot jump over pieces.
- Capture: the first piece on a diagonal within 2 tiles, if it is an enemy: the Ping moves onto it.
- The Ping cannot capture orthogonally and cannot move diagonally onto an empty tile.
